Jujiro: Architecture, Building, Construction and Housing
Tuesday 11th December 2019

Our moderator Aaron Taylor is an architect and registered RIBA Client Adviser. He is the Education and Commercial Sector Lead in the UK for Santec and drives the company's business development activities. Aaron is passionate about education design and has worked extensively within all levels of education providers across both the public and private sectors. He understands the relationship between education design and curriculum, and how the design of learning environments can impact attainment levels. Aaron leads the export of this knowledge across Santec's international education projects in addition to their work in the United Kingdom. He is a regular speaker on all aspects of education design across the UK and internationally, including the increasing synergies between education and innovative workplace design.

George Woodrow is an architect and designer working in the private residential sector in London and across the UK. He worked at Hopkins Architects for three years before founding Woodrow Architects in 2014; since then he has completed over 20 built projects including a copper roofed extension in Queen's Park, a charred timber extension in Brockley, an exposed structure extension in Hampton Hill and a full renovation with extensions to a house in Ladbroke Grove. The practice has a contemporary approach to design, but one which has a sensitivity to the historic context the projects are often situated in, and this is supplemented by George's conservation work as a Church Architect to St. Barnabas SW1. George is a Chartered Member of The Royal Institute of British Architects, The Royal Incorporation of Architects in Scotland and is a member of the Society for the Protection of Ancient Buildings.

Eirini Garoufalia is a project architect with over 7 years' experience covering all stages from initial concept design and planning through to technical design and site support. For the last 5 years, she has been working for large London practices where she has been project and package lead on complex mixed-use, residential, education and transport projects. She studied architecture at the University of Greenwich, the University of East London and The Bartlett, UCL and holds a Spatial Development Planning Masters from the University of Westminster. Eirini supports organisations that give girls and women the chance to discover their full potential and volunteers for Girlguiding and NAWIC.

Belén Francos-Taylor is an Architect and Director of Ansell + Bailey Architects. With over 20 years of expertise in the delivery of healthcare projects of all types and procurement styles, Belén is an acknowledged expert in her field across both NHS and Private Healthcare sectors. She is responsible for many of the practice's London Hospital framework projects from their inception to completion. She leads business development efforts for the firm and has a passion for the promotion of incorporating evidence-based design (EBD), the Well Standard, best practice and research into all her projects.
