## JUJIRO: HIGH TECHNOLOGY INDUSTRY

WEDNESDAY 10<sup>TH</sup> OCTOBER 2019

Our moderator John Thornhill is the Innovation Editor at the Financial Times writing a regular column on the impact of technology. John also hosts Tech Tonic, a weekly podcast on how technology is changing our economies, societies and daily lives. His guests have included Yuval Noah Harari, Martha Lane Fox, and Jimmy Wales.

John was previously deputy editor and news editor of the FT in London. He has also been Europe editor, Paris bureau chief, Asia editor, Moscow correspondent and Lex columnist.

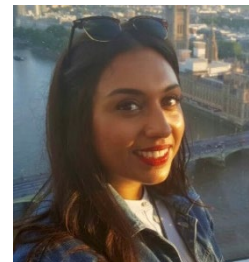

Nick Chrissos is the Director of Innovation Technology for Cisco in Europe. With over 20 years of IT and Networking industry experience, Nick's career includes both technical and business positions such as CTO of Collaboration in UK and the Head of Unified Communications Technology in Europe.

Nick sits on numerous IoT advisory boards consulting on cutting-edge technology solutions to transform the way we work, live and play. Nick also writes a blog on innovation.

Roshni Joshi is completing her PhD on the role of triglycerides in cardiovascular disease using a range of Big Data methods. Her journey has led her to use primary care data to investigate associations between lipid-lowering drugs and mortality following respiratory illness.

She will discuss how the correct application of healthcare data and new and emerging healthcare technology can help to predict disease, determine the efficacy of new interventions and identify people who might be at a higher risk of certain diseases.

Yassmin Abdel-Magied is a Sudanese-born Australian mechanical engineer, writer and social advocate. She worked on oil and gas rigs around Australia for almost half a decade before becoming a full-time writer and broadcaster in 2016. In the same year, she published her memoir Yassmin's Story: Who Do You Think I Am?

Her TED talk, has been viewed almost two million times and was chosen as one of TED's top ten ideas of 2015. Yassmin has been awarded numerous awards nationally and internationally for her advocacy, including the 2018 Young Voltaire Award for Free Speech.

Stephanie has been at QuantumBlack for 2+ years working as a user experience designer, designing user-centred data visualisations and bespoke digital tools for clients. She has a penchant for user research and applying design-thinking to solve cross-disciplinary analytics problems. She has worked across several client engagements in the pharmaceutical industry in addition to serving as leading UX design for several internal products, including the company's proprietary design system. Stephanie has also facilitated workshops for external tech-related events. Stephanie holds a BA in Design & Interaction from Central Saint Martins.
